

OATI Partners with NISC to Offer DERMS for Member Utilities

OATI's webSmartEnergy® DERMS platform fulfills NISC Co-op-Partner Program goals

Minneapolis, MN (March 06, 2023) - Open Access Technology International, Inc. (OATI) is pleased to announce its partnership with National Information Solutions Cooperative (NISC). OATI has integrated its innovative [webSmartEnergy®](#) DERMS solution with NISC's Marketing solution, Multi-Channel Messenger, Meter Data Management and SmartHub in the recently launched DERMS Integration Partner [Program](#). NISC selected OATI as its first partner in the program.

"We are grateful for the business opportunities NISC has entrusted to us over many years to empower their member utilities to use the best technology possible to deliver strategic programs with their consumers and to optimize distributed energy resources, such as solar, wind, battery storage, EVs and smart devices," says Sasan Mokhtari, Ph.D., OATI President and CEO. "We are very honored for NISC to select us as the first partner in its DERMS Integration Partner program, and the relationship that we have built together to provide their member owners with mission-critical solutions such [webSmartEnergy®](#) DERMS."

As part of the program, OATI will offer its webSmartEnergy DERMS suite of products, and Software-as-a-Service (SaaS) solution technologies, hosted from the OATI Cloud, for NISC member utility use. The OATI Cloud features the Energy Industry dedicated and NERC Critical Infrastructure Protection (CIP) compliant Data Centers for optimal security and reliability.

"We're excited to partner with OATI to offer our Members a turnkey solution to integrate DER into our existing enterprise solutions," says Walt Hillis, Product Manager for NISC. "By integrating with an industry-leading DERMS solution, our Members will be able to leverage the NISC solutions they use every day to engage their communities in DER programs."

In addition to OATI's industry-leading [webSmartEnergy®](#) DERMS, OATI also offers [GridMind™](#), the industry's premier microgrid controller; OATI [webSmartIoT™](#) a connected-devices platform enabling both smart utilities and smart cities with a wide variety of high-value use cases over an open standards based network including AMI; and OATI [EvoLution™](#), the Smart EV charging management solution. All are natively integrated with a webSmartEnergy DERMS.

“We look forward to helping NISC member utilities to manage their entire DR and DER program lifecycles for greater optimization, and thus fulfill the goals of the NISC Integration Partner Program,” adds Dr. Mokhtari. “Our technologies will also be helping these utilities by boosting grid situational awareness, flexibility, demand-side management, and grid reliability and resilience that will strengthen relationships with their consumers.”
